

Project: Keurig Green Mountain
Location: Waterbury, VT
Designer: Visnick & Caulfield Associates

Product: **STOUT** Reclaimed Hickory

STOUT from the enCORE collection by reSAWN TIMBER co. features antique reclaimed hickory. Hickory is known for its strength and durability as well as the strong contrast between lighter sapwood and darker heartwood. Reclaimed Hickory displays rich color tones, irregular grain patterns and plenty of character marks including mineral staining, color changes, weathering, checking, nail holes, knots and sometimes wormholes. For Keurig, the wood was treated by reSAWN to achieve a Class A Fire Rating and prefinished with hardwax oil.

The new headquarters build out for beverage technology company Keurig Green Mountain exemplifies how smart design can foster communal growth in a corporate setting. Visnick & Caulfield's final 430,000-square-foot design for the second phase of the multi-phase build out focuses greatly on reinforcing corporate brand, culture and community. Custom graphics and murals backed by huddle spots for impromptu collaboration are placed throughout each floor plate.

A major focus of design was on connectivity, encouraging interaction amongst employees distributed across six floors and two buildings. To enhance this, each floor within the buildings features a lounge space at the core to allow for vertical adjacencies and movement. Moreover, each lounge has a unique scheme that relates to Keurig Green Mountain's business, ranging from a soda shop to a coffee bar with customized units to hold the numerous varieties of beverage products. The finished 6-floor main building, which is LEED Gold Certified, also features highly designed amenities including two conference centers, an executive floor, a fitness center and a 10,000-square-foot cafeteria and multifunction space. The lighting design houses all LED light fixtures with daylight harvesting features. To connect the first phase project, a 100,000-square-foot R&D lab area including a 50,000-square-foot high bay facility and 50,000-square-foot office space that was LEED Silver certified, the team designed a branded skybridge linking the two buildings together.

STANDARD DIMENSIONS & EDGE DETAIL:

	Solid
Thickness:	3/4"
Width:	5"
Random Lengths:	2'-10'
Edges:	Square *

Note: Additional widths and lengths available upon request.
 * Microbeveled Edges recommended for prefinished products.

INSTALLATION GUIDE:

	Solid
Above-grade	YES
On-grade	YES
Below-grade	NO
Over Radiant Heat	YES

SUSTAINABLE ATTRIBUTES:

CERTIFICATION	Available as FSC-Certified
POSSIBLE LEED CREDITS	MR 4 - Recycled Content MR 5 - Regional Materials MR 6 - Rapidly Renewable Resource (Hardwax-Oil Finish) MR 7 - Certified wood (as FSC certified) EQ 4.1 - Low-emitting materials: Adhesives & Sealants (Hardwax-Oil Finish) EQ 4.2 - Low-emitting materials: Paints & Coatings (Hardwax-Oil Finish) EQ 4.4 - Low-emitting materials: Composite Wood & Agrifiber Products (Engineered)

Photo Disclaimer: Project and product photos are meant to be a general guide to product appearance only. Due to our handcrafted process and wood being a product of nature, the color, grain pattern, character and profile will vary between individual boards on a project and will never be an exact match.
